

# The Stellar Solar Bench™

The Stellar Solar™ Bench is a versatile outdoor bench that offers USB mobile device charging and utilises solar energy without the need to be wired to an electricity supply. The simple design of the bench allows solar energy to be collected and stored in the integrated controlled battery system and used as and when required.

The stored energy also powers LED lighting during hours of darkness on the bench and can be utilised for Wi-Fi etc.

## Features

- Solar Power autonomy
- Mobile Device charging
- Temperature controlled Ventilated setting
- Vandal Resistant
- Quality Built Materials
- Easy install and mobility

## Dimensions

- Length: 1680mm
- Width: 700mm
- Height: 452mm

## Specification

- 13mm toughened laminated glass top
- 95 Ahr verta gel battery system with regulated 10A inverter
- 100Wp monocrystalline generating solar panel
- 4 x 1A/2A USB waterproof ports
- Tropical hardwood timber end panels

## Customisation

- Ambient LED lighting
- Themed / branded ends
- Signage / advertising
- Wi-Fi
- Data gathering
- RAL colour options
