

HydroPod

hand wash

Hand Washing Has Never Been So Sleek. So Accessible. So Easy...

Here for your business, shop, event, employees and everything in between. Hand washing on the go made simple with HydroPod hand wash.

Touch Free

Automatic soap & water wash your hands completely touch free.

Water Saving Plumbing

Flow regulator conserves water, making HydroPod environmental and economical.

Mains or Battery Operated

Connect your mains or use our installed battery for ease.

ACCESSIBLE

Accessibility is a key focus of the design. The sink and dispenser heights are chosen to comply with wheelchair regulations. The hand-wash station can be mains or standalone operated.

EFFICIENT

The unit is ideal for hospitals, schools, offices, high risk buildings where bathrooms are occupied quickly and large indoor events. It has wheels which allows for quick and easy transportation when required. It can be used in both indoor and outdoor environments and will fit in neatly due to its compact design.

ECONOMICAL

Easy upkeep. The water tanks are easily distinguished by colour when filling and emptying. There is a bulk refill soap dispenser along with a large hand towel dispenser. These are more economical and flexible options designed to minimise station upkeep.

RESPONSIVE

The HydroPod's presence in any business or event boosts safety assurances for customers. It is a visible response to Covid-19 that can be implemented in a variety of situations. The HydroPod is a product sourced from quality materials, designed to be long-lasting, and can be relied on to provide safety through COVID-19 and beyond.
